

FALL GARDEN TASKS

- ❁ Don't cut back everything. Leave flowers, stems and grasses standing. Spring pollinators overwinter here and winter birds eat the seeds.
- ❁ Plant a cover crop as mulch.
- ❁ Dig up tender bulbs and use windbreaks and mulch to protect tender plants.
- ❁ Don't rake the leaves... mulch them with your mower and leave them on the grass or gather the mulched leaves and put them on your gardens.
- ❁ Fall is a great time to plant perennials, shrubs and trees.
- ❁ Winterize your pond to enable plants and fish to survive.
- ❁ Final weeding in the fall keeps those weed seeds from spreading.

To extend your garden into fall and winter go to <https://extension.psu.edu/season-extenders-and-growing-fall-vegetables>. For more information about winter garden tasks go to <https://extension.psu.edu/gardening-prep-during-the-cold-winter-months>.

For more information go to <https://extension.psu.edu/fall-garden-tasks> or see the NW PA SYNOD GREEN TEAM link on the NWPA SYNOD website for more information.
